

Abigail Natale, B.S., QMHP-Trainee

Originally from Delaware, I moved to Richmond in 2020 after graduating from Liberty University with my Bachelor of Science in psychology. I have extensive experience working with families and children of all ages in dynamic environments. My clinical experience includes promoting positive behaviors in children with autism and ADHD through in-home Applied Behavior Analysis therapy. I am passionate about working alongside individuals and helping to equip others with the tools necessary to succeed. Ultimately, I plan on continuing my education to continue to advocate for and support those in my community with evidence-based practices. When I'm not working, I love to experiment with new recipes (usually something sweet), spend time outside, and tackle DIY projects.
