

## Avera Pearson, BSW

I graduated from Mary Baldwin University in 2022 with a Bachelors of Social Work. I have assisted with the case management, resource navigation, and daily events of women experiencing homelessness. I have experience working with individuals dealing with grief and loss, trauma, substance use, anxiety, depression, and illness. I utilize a person centered, strength based and narrative theory approach and emphasize building a strong relationship with each individual. My favorite aspect of working in this field is the rapport and relationship building that forms a strong foundation for the individual to reach their goals.

During my free time I love drawing, ceramics, hiking, swimming, baking, learning new things, and catching up on all my television shows.
