

Celeste Glave, B.A., QMHP-C

I began my journey studying Psychology and Childhood Studies through Christopher Newport University, and graduated with my Bachelors in May of 2017. I am currently pursuing my Master's in Professional Counseling at Liberty University and hope to graduate in 2019. I have a background in Applied Behavioral Analysis and worked as a behavior therapist with children with Autism Spectrum Disorder and other developmental/intellectual disabilities. I currently provide therapeutic services to individuals, parents, and families utilizing a person-centered and strengths-based approach. I incorporate music, art/creative techniques, Cognitive Behavior Therapy techniques, and more to aid individuals in treatment. I have a passion for working with children and families and have experience in anger management, anxiety, depression, OCD, ADHD, PTSD, and ASD. Outside of work I'm usually watching old Disney movies, playing the guitar and singing, drawing, painting, or hanging with friends and family!
