

Diana Nguyen, B.S., QMHP-C

I graduated from Virginia Commonwealth University with my Bachelor of Science in Psychology. I also have a certificate in Early Childhood Development. I have been working with children both in general education settings as well as clinical settings. My clinical experience includes working with children diagnosed with autism. I assisted clients with comorbid diagnoses such as ADHD, anxiety, emotional regulation, and behavioral concerns such as aggression. My experience working with clients has been both center-based and in home. I have a genuine passion and joy for working with kids. I believe that we should be creating a safe space and a solid support system for kiddos so that they're able to find their voices and understand their emotions to build appropriate coping skills. My ultimate career goal is to become a registered play therapist and work through early childhood trauma and other early childhood issues through a gentle approach.

In my free time, I enjoy playing games, writing, reading, and spending time with friends and family.
