

## Michelle Curry, M.A., Resident in Counseling

I have a Masters in Community Counseling from Slippery Rock University. My professional career of providing mental health services started early on and I had wonderful opportunities of having great mentors and leaders during my professional path. I believe that a part of providing mental health supports includes advocacy and promoting equity across cultures. I believe in utilizing a trauma informed systems-based approach while working with children and families to support them being their desired version of their best self. I have had the opportunity to provide supports to individuals with significant mental health, survivors of violence/abuse, substance abuse, survivors of systematic trauma, and an array of other circumstances. Each day is a learning opportunity that I embrace.
