

Niesha Cherry, BSW, QMHP-A

I graduated from Virginia Commonwealth University in 2011 with a Bachelors of Social Work (BSW) and a minor in psychology. I have 10 years of experience working with adolescents and adults in a community-based setting to foster skills to assist them in leading healthier, fulfilling lives. In addition, I completed 2 years of internships through the Richmond City Health District working with pregnant and parenting teens and communicable disease control departments as well as a placement in the Henrico Juvenile and Domestic Relations court as a juvenile probation and parole officer. My professional strengths are utilizing a client centered approach and a strengths-based perspective to address areas of improvement. My favorite part about working every day is rapport building and fostering relationships with individuals to help them help themselves. I begin every day with a smile and work to make sure every person I come in contact with leaves with a smile as well.
